

NEW GENERATION PLASTIC COMPOSITE SCAFFOLD BOARDS

DANGER !!!
BEWARE OF UNSAFE PLANKS!
IS IT WORTH RISKING INJURY AND COMPANY REPUTATION IN ORDER TO SAVE COSTS?

We create a peace of mind for you in construction industry.

Who we are

Uber Engineering is a Singapore manufacturer of plastic composite board. At Uber, we design, develop and manufacture plastic composite boards with the aim to replace conventional materials through value-added product innovation.

Plastic composite boards are ideal in application of scaffolding as plank to create a safety working environment in construction industry.

Tuffplank

Plasdeck

Tuffdeck

Designed as a drop-in replacement for your scaffold board system to replace plywood and timber/LVL planks with the use of UBER's reinforced all-plastic composite boards.

- Made of proprietary plastic with metal reinforcement sheets for strength & durability
- Long Life Span = Cost Savings
- Mechanical strength remains constant, does not warp or deform over its lifespan
- Easy maintenance due to its non-stick plastic material
- Plastic Composite Boards does not snap or fracture like wooden boards
- Designed for scaffold classes of 120kg/m², 240kg/m² & 360kg/m²
